Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. A preliminary amendment submitted by applicant was received on 11/18/2005.
2. Claims 35-37 and 39-41 are cancelled.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 17, 24-29, 38 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Roycroft (US 6855017 B2). Roycroft discloses all of the claimed features, including amphibious vehicle with fluid inlet, outlet and conduit, impeller (which can be driven in forward and reverse direction), stator, power take off, drive shaft(s) (drive and axle shafts) skewed horizontally and/or vertically relative to the longitudinal axis of the vehicle, universal and constant velocity joint(s) [18, 20]. See Figs. 1-3. Claims 2-16, 18-23, and 30-34 are purely design choice ratio, ranges or values which are not defined in the disclosure to merit significance for consideration of novelty and therefore carry no patentable weight in this utility application.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-16, 18-23, and 30-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roycroft (US 6855017 B2). Roycroft discloses all features claimed, with the exception of the design ratios, ranges and values specifically recited for the claimed features. The recited ratios, ranges and values for the claimed features are considered obvious design choices since it would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to adapt the design for Roycroft with these values to create the invention as claimed by applicant. The motivation would have been to optimize design and/or performance characteristics to enhance or improve upon the invention.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rodler, Jr. (US 4993977), Elger (US 5649843) and Blanchard (US 6273768 B1) each show a water jet propulsion unit/module with similar features as those claimed by applicant.
